Landscaping . Plant Rental . Events . Garden Maintenance

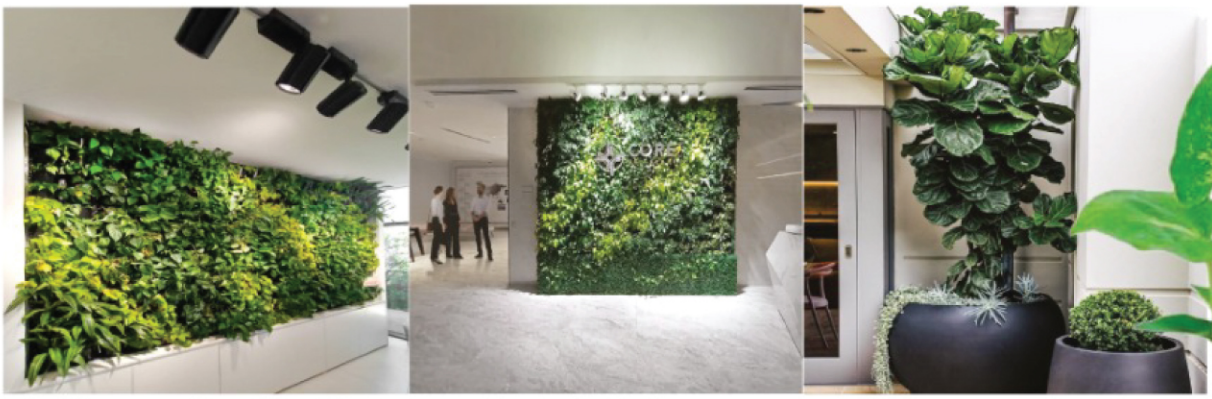

midorie

What is Pafcal?

Pafcal are lightweight, soil-free growing media made from a spongy, porous material designed for plant germination, propagation, and indoor gardening.

Developed in Japan by the Toyota Suntory Company, Pafcal is a mix of sponge and organic ground matter engineered to maintain an ideal 3:7 ratio of water to air (70% air and 30% water), which prevents root rot and promotes healthy plant growth.

Visit us at: Hall 6 Oasis, KLCC convention centre.

We are specially in soilless potter plant:

In & outdoor plants for home & office setup . Green wall design .
Plant rental & maintenance service . Workshop . Event green wall setup.
